Note: STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

Note: Suite à l'augmentation des données administratives dans la compostion des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel.

CANSIM tables: 281-0028 and 281-0039

Suite à l'augmentation des données administratives dans la compostion des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel

Tableaux CANSIM: 281-0028 et 281-0039

Note:

Unadjusted for seasonality. Annual data are the averages of the monthly indexes. How these fixed-weighted indexes are constructed is described in the September 1989 issue of the CEO.

STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

Inclut le temps supplémentaire.

Non désaisonnalisés. Les données annuelles sont la moyenne des indices mensuels. L'article de l'édition de septembre 1989 de L'OÉC décrit en détail la construction de ces indices à pondération fixe

- 1 Unadjusted for seasonality, except regular beneficiaries and initial and renewal claims received.
- 2 Annual data are averages of the monthly estimates except for benefit weeks and claims received, where the sums are used. Another estimate of El coverage, derived from annual tax returns filed with Revenue Canada, is also available on request.
- 3 Effective annual % increase in base rates.
- Includes all strikes and lockouts, legal or illegal, lasting one-half day or more and amounting to 10 or more person-days lost. Time lost by workers indirectly affected, such as those laid off because of a stoppage by other employees, is not included.

- 1 Non désaisonnalisés, sauf les estimations de prestations régulières et les demandes initiales et renouvelées.
- 2 Les données annuelles sont obtenues en calculant la moyenne des totaux mensuels sauf dans le cas du nombre de prestations et des demandes initiales et renouvelées pour lesquels on prend la somme. Une autre estimation annuelle du nombre de personnes visées par l'assurance-emploi, tirée des déclarations d'impôt de Revenu Canada, est disponible.
- 3 Augmentation annuelle en % en vigueur des taux de base.
  - Comprennent tous les lock-out et les grèves, qu'ils soient légaux ou illégaux, d'une durée d'une demi-journée ou plus et répresentant 10 jours-personnes ou plus de temps perdu. Le temps perdu par les travailleurs indirectement touchés, comme ceux qui sont mis à pied par suite de l'arrêt de travail d'autres employés, n'est pas compris.

Note:

STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9.

CANSIM tables: 382-0006 and 281-0025

Note:

Suite à l'augmentation des données administratives dans la composition des estimations. STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

Note:

STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

CANSIM tables: 382-0006 and 281-0025

Note:

Suite à l'augmentation des données administratives dans la compostion des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel.

Suite à l'augmentation des données administratives dans la compostion des estimations. STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel.

Tableaux CANSIM: 281-0028 et 281-0039

Note:

Note

Unadjusted for seasonality. Annual data are the averages of the monthly indexes. How these fixed-weighted indexes are constructed is described in the September 1989 issue of the CEO.

STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

CANSIM tables: 281-0028 and 281-0039

Non désaisonnalisés. Les données annuelles sont la moyenne des indices mensuels. L'article de l'édition de septembre 1989 de L'OÉC décrit en détail la construction de ces indices à pondération fixe.

Note:

STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9.

CANSIM tables: 382-0006 and 281-0025

Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

Note:

Suite à l'augmentation des données administratives dans la compostion des estimations. STC etudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel

Note: Suite à l'augmentation des données administratives dans la composition des estimations. STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel.

Unadjusted for seasonality. Annual data are the averages of the monthly indexes. How these fixed-weighted indexes are constructed is described in the September 1989 issue of the CEO.

Note: STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

CANSIM tables: 281-0028 and 281-0039

Inclut le temps supplémentaire.

Non désaisonnalisés. Les données annuelles sont la moyenne des indices mensuels. L'article de l'edition de septembre 1989 de L'OÉC décrit en détail la construction de ces indices à pondération fixe.

Suite à l'augmentation des données administratives dans la composition des estimations, STC etudie l'impact sur l'EERH Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

(v1596782)

STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

Note:

Suite à l'augmentation des données administratives dans la compostion des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue pénode de référence et pour la répartition de l'emploi industriel.

CANSIM tables: 281-0028 and 281-0039

Note:

Suite à l'augmentation des données administratives dans la compostion des estimations, STC etudie i impact sur l'EERH Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue periode de référence et pour la répartition de l'emploi industriel.

Tableaux CANSIM: 281-0028 et 281-0039

Unadjusted for seasonality. Annual data are the averages of the monthly indexes. How these fixed-weighted indexes are constructed is described in the September 1989 issue of the CEO.

STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded Note: that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

Inclut le temps supplémentaire.

Non désaisonnalises. Les données annuelles sont la moyenne des indices mensuels. L'article de l'édition de septembre 1989 de L'OÉC décrit en détail la construction de ces indices à pondération fixe.

- 1 Unadjusted for seasonality, except regular beneficiaries and initial and renewal claims received.
- 2 Annual data are averages of the monthly estimates except for benefit weeks and claims received, where the sums are used. Another estimate of El coverage, derived from annual tax returns filed with Revenue Canada, is also available on request.
- 3 Effective annual % increase in base rates.
- Includes all strikes and lockouts, legal or illegal, lasting one-half day or more and amounting to 10 or more person-days lost. Time lost by workers indirectly affected, such as those laid off because of a stoppage by other employees, is not included.

- Non désaisonnalisés, sauf les estimations de prestations régulières et les demandes initiales et renouvelées.
   Les données annuelles sont obtenues en calculant la moyenne des totaux mensuels sauf dans le cas du
  - nombre de prestations et des demandes initiales et renouvelées pour lesquels on prend la somme. Une autre estimation annuelle du nombre de personnes visées par l'assurance-emploi, tirée des déclarations d'impôt de Revenu Canada, est dissonible.
- 3 Augmentation annuelle en % en vigueur des taux de base.
  - Comprennent tous les lock-out et les grèves, qu'ils soient légaux ou illégaux, d'une durée d'une demi-journée ou plus et répresentant 10 jours-personnes ou plus de temps perdu. Le temps perdu par les travailleurs indirectement touchés, comme ceux qui sont mis à pied par suite de l'arrêt de travail d'autres employés, n'est pas compris.

Note:

STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9

CANSIM tables: 382-0006 and 281-0025

Note:

Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

Unadjusted for seasonality. Annual data are the averages of the monthly indexes. How these fixed-weighted indexes are constructed is described in the September 1989 issue of the CEO.

CANSIM tables: 281-0028 and 281-0039

Note: Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une pius longue periode de référence et pour la répartition de l'emploi industriel.

Tableaux CANSIM: 281-0028 et 281-0039

STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded Note. that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

Non desaisonnalises. Les données annuelles sont la moyenne des indices mensuels. L'article de l'edition de septembre 1989 de L'OÉC décrit en détail la construction de ces indices à pondération fixe.

- 1 Unadjusted for seasonality, except regular beneficiaries and initial and renewal claims received.
  - Annual data are averages of the monthly estimates except for benefit weeks and claims received, where the sums are used. Another estimate of El coverage, derived from annual tax returns filed with Revenue Canada, is also available on request.
- 3 Effective annual % increase in base rates.
- 4 Includes all strikes and lockouts, legal or illegal, lasting one-half day or more and amounting to 10 or more person-days lost. Time lost by workers indirectly affected, such as those laid off because of a stoppage by other employees, is not included.

Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment

CANSIM tables: 382-0006 and 281-0025

Note:

Note : Suite à l'augmentation des données administratives dans la compostion des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel

CANSIM tables: 281-0028 and 281-0039

Note: Suite à l'augmentation des données administratives dans la compostion des estimations. STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel

Tableaux CANSIM: 281-0028 et 281-0039

Unadjusted for seasonality Annual data are the averages of the monthly indexes. How these fixed-weighted indexes are constructed is described in the September 1989 issue of the CEO.

Note: STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

Non désaisonnalisés. Les données annuelles sont la moyenne des indices mensuels. L'article de l'édition de septembre 1989 de L'OÉC décrit en détail la construction de ces indices à pondération fixe.

- Unadjusted for seasonality, except regular beneficiaries and initial and renewal claims received.
- Annual data are averages of the monthly estimates except for benefit weeks and claims received, where the sums are used. Another estimate of El coverage, derived from annual tax returns filed with Revenue Canada, is also available on request.
- Effective annual % increase in base rates.
- Includes all strikes and lockouts, legal or illegal, lasting one-half day or more and amounting to 10 or more person-days lost. Time lost by workers indirectly affected, such as those laid off because of a stoppage by other employees, is not included.

- Non désaisonnalisés, sauf les estimations de prestations régulières et les demandes initiales et renouvelées.
- Les données annuelles sont obtenues en calculant la moyenne des totaux mensuels sauf dans le cas du nombre de prestations et des demandes initiales et renouvelées pour lesquels on prend la somme. Une autre estimation annuelle du nombre de personnes visées par l'assurance-emploi, tirée des déclarations d'impôt de Revenu Canada, est disponible.
  - 3 Augmentation annuelle en % en vigueur des taux de base.
    - Comprennent tous les lock-out et les grèves, qu'ils soient légaux ou illégaux, d'une durée d'une demi-journée ou plus et répresentant 10 jours-personnes ou plus de temps perdu. Le temps perdu par les travailleurs indirectement touchés, comme ceux qui sont mis à pied par suite de l'arrêt de travail d'autres employés, n'est pas compris.
